

# Chrome Extensions for Productivity (via Noom)

---

## Forest: stay focused, be present

### Notes:

Forest provides an interesting solution to save you from Internet addiction. You can plant a seed in Forest. In the next 30 minutes, this seed will gradually grow into a tree. However, if you cannot resist the temptation and start to browse the websites on your Blacklist, your tree will wither away. With this interesting mechanism, the sense of achievement and responsibility will drive our users to stay away from the distractions with no pain.

### *Features:*

- A self-motivated and interesting method to help you beat Internet addiction
- Cultivate your personal pattern of time management: make good use of 30-minutes to fully concentrate on your work and finish it effectively
- Share your trees with friends

## StayFocusd

### **Notes:**

You sit down at the computer, and you swear you'll be productive. Next thing you know, it's twelve hours later. You've checked your email, updated your Facebook status, blown through 200 pages of Reddit, read every article in your Twitter feed, looked up your favorite band on Wikipedia, vanity googled yourself, cyber-stalked your ex, browsed through all your high-school crushes' Instagram feeds, and lost a week's pay playing online poker.

*What you haven't done is WORK.*

StayFocusd is a productivity extension for Google Chrome that helps you stay focused on work by restricting the amount of time you can spend on time-wasting websites. Once your allotted time has been used up, the sites you have blocked will be inaccessible for the rest of the day.
